SUGGESTED IDLE REDUCTION EDUCATION PLAN BY CALIFORNIA STATE AGENCY SUCH AS THE AIR RESOURCES BOARD

While Idle-Free California strongly advocates for expanding California's vehicle idling regulation to include passenger vehicles, regardless, **a California state agency must lead an educational initiative to reach California's 24 million passenger vehicle motorists.** The following suggestions can also be shared with California air districts, and state environmental and health organizations.

- No-idling signs placed in strategic locations
- California state agency (such as ARB) idle reduction webpage; twelve other state agencies have webpages or documents that include passenger vehicle idle reduction education; see below
- California state agency (such as ARB) passenger vehicle idle reduction video; example: East Bay Clean Cities "To Idle or Not to Idle" <https://www.youtube.com/watch?v=PTbJrEbxs64>
- Collaboration with the DMV to list idle reduction as a fuel-efficient driving tip in the CA Drivers' Handbook and to include it as a driver exam test question
- Collaboration with the DMV to include idle reduction information rack cards at all DMV locations
- Collaboration with CAPCOA in consideration of air districts providing idle reduction education on their websites and in documents
- Collaboration with the California Dept. of Education to promote ACR-160 https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201520160ACR160, a resolution to encourage motorists to not idle their motor vehicles near places where children congregate, such as in the school community
- Issuing of news releases about this initiative
