

### Vehicle Idling

General: Since 2017, the CAC has engaged the public about the benefits of reducing idling through information displays, handouts, and interactive materials like quizzes. The handouts include fact sheets from the Department of Energy as well as from Idle-free California. We also provide anti-idling decals.

HALS (Healthy Air, Living Schools): a program supported by the San Joaquin Valley Air Pollution Control District, which includes posting anti-idling signs at school pickup/dropoff spots. The CAC has advocated for this program since its inception, recruiting support from Stockton's Vice Mayor and presenting to the County Superintendent of Schools.

Idle-free California: The CAC successfully introduced this program to Venture Academy in Stockton, where a variant of it has been run in the 2018-19 and 2019-20 school years. We have advocated for this program to school leaders for several years, including the County Superintendent of Schools.
